

Assignment 26: Project Logs
Due Tonight, Thursday 5/23
by 11:59pm

May 23, 2019
CS: DS&A
PROOF SCHOOL

The end of the project approaches! You will present a 5 minute explanation or demonstration of your project to the class next Thursday, the last day of class. In this assignment, spend some time thinking about the endgame of your project, and write it down in your online document. Include:

- What work do you have left to do? (For example: understanding an algorithm, coding it up, coding an application. Be as specific as possible. This is work that you should finish up this weekend.)
- What exactly will you present on Thursday? Again, give a very specific description, like “I will present the problem of X and describe the main algorithm used with an example on the board”, or “I will describe a problem, briefly explain my code, and show a demonstration of it working.” (You will have Tuesday in class to work on the presentation itself.)
- Will you need your laptop projected?
- Also, two final questions: Are you willing to give your presentation in the last 15 minutes of Tuesday’s class? Are you willing to show your project at the end-of-year symposium?

Have fun!!!
